THE FUCINO 2015 PROGRAM
HAS BEEN PRINTED WITH THE CONTRIBUTE
OF ASI - AGENZIA SPAZIALE ITALIANA

*Dear Participants,
welcome to Fucino 2015!*

As mayor of Pescara, and also on behalf of the 1915-2015 Pescara Committee I am very honoured to host this international workshop in our small town.

We are in the epicentral area of the 1915 Fucino earthquake: this event was a catastrophe for Pescara and other surrounding villages that changed our history for ever with a remarkable social impact.

One hundreds years later we wish to keep the memory of such a tragic event. Thus, we are very glad to promote this workshop as an action for sharing and discussing the most recent scientific developments in the seismic hazard assessment.

*Antonio Iulianella
Mayor of Pescara Municipality*

Dear Participants,

The Fucino 2015 event will be the 6th INQUA international workshop in the last six years after those held in Baelo Claudia, Corinth, Morelia, Aachen and Busan. All these meetings have been supported by INQUA TERPRO Focus Group on Paleoseismology and Active Tectonics (PALACTE), and have seen fruitful and intense discussions among the participants.

During the Fucino 2015 event we will discuss the almost final results of the INQUA Project 1299 – EEE METRICS Parametrization of Earthquake Environmental Effects (2011-2015) that will end on July 2015 at the INQUA Congress in Nagoya (Japan). It will be also the occasion to further discuss future joint research projects for the 2015-2019 intercongress period.

*Pablo G. Silva
President of INQUA TERPRO PALACTE*

WELCOME
TO FUCINO 2015

6th INQUA
International Workshop
on Active Tectonics
Paleoseismology
and Archaeoseismology

Dear Participant,

This event will be the 6th INQUA International Workshop on Active Tectonics Paleoseismology and Archaeoseismology, that follows the previous successful INQUA "PATA days" meetings.

A well-qualified community of scientists in the field of active tectonics, paleoseismology and archaeoseismology participates to this event: almost 200 participants from 25 different countries have registered and more than 150 extended abstracts have been accepted for publication in the Abstract Volume!

During the workshop, organized by INGV, ISPRA and University of Insubria, we will remember the centenary of the 1915 M7 Fucino earthquake, that was one of the largest and devastating earthquakes ever occurred in Central Italy. The Scientific sessions will be attended in the unique historical and cultural atmosphere of Pescina's village, affected by extensive coseismic surface faulting in 1915. A 2 days field trip in the Fucino and L'Aquila areas will follow, retracing in the field the path of faults, landscapes, castles and ancient settlements. Moreover, the participants will have the opportunity to join a pre-congress archaeoseismic tour downtown Roma.

Although the scientific program is very intense, participants will have also the opportunity to discover the history, tradition and food of Abruzzi.

We wish to acknowledge all the people that supported this event, and in particular the Mayor of the Pescina municipality, the members of the Scientific Committee and the sponsors.

Finally we wish to thank all the participants for their contribution to Fucino 2015!

The Fucino 2015 Organizing Committee

Anna Maria Blumetti
Francesca Romana Cinti
Paolo Marco De Martini

SUMMARY
PROGRAM

6th INQUA
International Workshop
on Active Tectonics
Paleoseismology
and Archaeoseismology

SUNDAY 19

10.00 - 16.00 Pre-Congress Field Trip
16.30 - 18.30 Bus transfer Roma-Pescina
18.30 - 20.30 Ice-breaking party

MONDAY 20

9.00 - 10.00 Welcome, Opening Ceremony
10.00 - 11.00 Commemoration of the 1915 Fucino earthquake
11.00 - 11.30 Coffee Break + Poster Session

Quaternary geology

11.30 - 13.10 Oral Session Part 1
13.10 - 15.00 Lunch
15.00 - 16.30 Oral Session Part 2
16.30 - 17.30 Coffee Break + Poster Session

Archaeoseismology

17.30 - 18.35 Oral Session

TUESDAY 21

Paleoseismology

9.00 - 10.20 Oral Session Part 1
10.20 - 11.20 Coffee Break + Poster Session
11.20 - 13.05 Oral Session Part 2
13.05 - 15.00 Lunch
15.00 - 16.35 Oral Session Part 3
16.35 - 17.00 Coffee Break + Poster Session
17.00 - 18.30 EPOS-EuroGeoSurveys Workshop

WEDNESDAY 22

Seismic and Tsunami Hazard

9.00 - 10.30 Oral Session Part 1
10.30 - 11.30 Coffee Break + Poster Session
11.30 - 13.05 Oral Session Part 2
13.05 - 15.00 Lunch
15.00 - 16.40 Oral Session Part 3
16.40 - 17.15 Coffee Break + Poster Session
17.15 - 18.00 INQUA Business meeting

THURSDAY 23

9.00 - 18.00 Post-Congress Field Trip: Fucino basin
18.00 - 18.30 Bus transfer to Ovindoli

FRIDAY 24

8.30 - 17.30 Post-Congress Field Trip: L'Aquila basin
17.30 - 19.30 Bus transfer to Roma

DAILY SCIENTIFIC PROGRAMME

*The Fucino 2015 Abstracts Volume is published on the on-line journal *Miscellanea INGV*
<http://istituto.ingv.it/l-ingv/produzione-scientifica/miscellanea-ingv/view>
 The Abstracts Volume and the Field-Trip Guide are included in the Fucino 2015 pen-drive.*

The 1915 Fucino earthquake

- 10.00 - 10.20 *The 1915 earthquake in central Italy: macroseismic effects and long-term traces in the urban landscapes - Galadini F. (Solicited)*
- 10.20 - 10.40 *Magnitude characterisation and aftershocks of the 1915 Fucino earthquake Margottini C. (Solicited)*
- 10.40-11.00 *Surface faulting of the 1915 Fucino earthquake - Michetti A.M. (Solicited)*
 • Coffee Break + Poster Session •

QUATERNARY GEOLOGY

- 11.30 - 11.50 *Overview of combining regional strain-rate, slip-rate variability and stress transfer during fault interaction for seismic hazard assessment and understanding of continental deformation
 Roberts G. P., Cowie P.A., McCaffrey K., Gregory L. C., Phillips R. J., Faure Walker J., Wedmore L., Watson Z., Sammonds P., Papanikolaou I., Zijerveld L. J. J., Dunai T. J., Binnie S. A., Freeman S., Wilcke K., Shank, R., Vittori E., Michetti, A.M. (Invited)*
- 11.50 - 12.10 *Detailed fault slip-histories based on cosmogenic ³⁶Cl analyses from Abruzzo, Italy, reveal fault behaviour over multiple earthquake cycles
 Gregory L.C., Phillips R. J., Roberts G. P., Cowie P.A., Shanks R. P., McCaffrey K., Wedmore L. N. J., Papanikolaou I., Faure Walker J. P., Watson Z. K.*
- 12.10 - 12.25 *The Dinaric Faults System: large-scale structure and rates of slip of the compressive northeastern boundary of the Adria microplate
 Moulin A., Benedetti L., Rizza, M., Jamsek-Rupnik P., Gosar A., Bourlès D., Ritz J-F*
- 12.25 - 12.40 *Active tectonics at the frontal Potwar Plateau, NW Himalaya of Pakistan: Insights from 10Be ages in fluvial terraces at the Mahesian Anticline and seismic hazard implications
 Cortés-Aranda J., Mugnier J-L., Vassallo R., Jouanne F., Carcaillet J., Adnan,*
- 12.40 - 12.55 *In sequence/out-of sequence Late-Quaternary deformation in Northwestern Himalaya
 Vassallo R., Mugnier J. L., Vignon V., Malik M.A., Jouanne F., Jayangondaperumal R., Buoncristiani J.F., Carcaillet J., Jomard H.*
- 12.55 - 13.10 *Pleistocene-Holocene catastrophic events in the lakes of central Mexico recorded from diatomites and detritic sediments
 Israde-Alcántara I., Garduño-Monroy V.H., Rodríguez-Pascua M.A*
 • Lunch •

- 15.00 - 15.15 *Characterizing Active Faults in the Urban Area of Vienna
 Decker K., Grupe S., Hintersberger E.*
- 15.15 - 15.30 *Frequent earthquakes recorded in a section with twelve seismites at Rakuti (SE Latvia)
 Van Loon A.J., Pisarska-Jamrozó M., Nartišs M., Krievāns M., Soms J.*
- 15.30 - 15.45 *Study of the links between slip at depth and at the surface for the 1997 Colfiorito earthquakes using detailed structural mapping: the role of fault orientations
 Watson Z. K., Roberts G. P., Faure Walker J. P., Wedmore L. N. J.*
- 15.45 - 16.00 *The Mw=5, 2013 Matese earthquake epicentral area (southern Italy): new data on the earthquake ground effects and active tectonics framework
 Valente E., Ascione A., Bigi S., Buscher J., Ciotoli G., Porfido S.*
- 16.00 - 16.15 *Preliminary imaging of active faults in the Montello-Collalto area (Southeastern Alps, Italy) by a high-sensitivity seismometric network
 Romano M.A., Peruzza L., Priolo, E., Garbin M., Picotti V., Guido F.L., Ponza A.*
- 16.15 - 16.30 *Radon distribution as shallow evidence of buried fault geometry in the Fucino plain (Central Italy)
 Ciotoli G., Bigi S., Cavinato G.P.*
 • Coffee Break + Poster Session •

ARCHAEOSEISMOLOGY

- 17.30 - 17.50 *Analysis of potential earthquake damage in the Via dei Pilastrì, Alba Fucens, Central Italy
 Hinzen K., G., Galadini F., Kehmeier H., Schwellenbach I., Reamer S.K.*
- 17.50 - 18.05 *ArMedEa project: archaeology of medieval earthquakes in Europe (1000-1550 AD). First research activities
 Forlin P., Gerrard C., Petley D.*
- 18.05 - 18.20 *New insights on the occurrence of ancient earthquakes in Central Spain: archeoseismology of the Computum Area (4th century AD, Madrid)
 Rodríguez-Pascua M.A., Heras C., Bastida A. B., Giner-Robles J. L., Silva P. G., Perucha M.A., Roquero E., Carrasco P., Pérez-López R., Lario J., Bardaji T.*
- 18.20 - 18.35 *Archaeoseismological investigation of earthquake induced ground liquefaction events at the Early Christian Basilica, Ancient Lechaion harbour, Corinth, Greece
 Minos-Minopoulos D., Pavlopoulos K., Apostolopoulos G., Lekkas E., Dominey-Howes D.*

PALEOSEISMOLOGY

- 9.00 - 9.20 *Surface Faulting from the August 24, 2014 Mw 6.0 South Napa, CA, Earthquake*
Schwartz D.P., Ponti D.J., Dawson T.E., Brooks B.A., DeLong S.B., Hecker S., Hudnut K.W., Kelson K.I., Lienkaemper J.J., Prentice C.S., Rosa C.M., Rubin R.S., Seitz G.G., Sickler R.R., Wesling J.R. (Invited)
- 9.20 - 9.35 *First lateral slip-rates along the left-lateral strike-slip Alhama de Murcia fault obtained with 3D trenching (SE Iberian Peninsula)*
Ferrater M., Ortuño M., Masana E., Perea H., Baize S., Pallàs R., García-Meléndez E., Echeverría A., Martínez-Díaz J.J., Rockwell T.
- 9.35 - 9.50 *Holocene activity of the Mariánské Lázně Fault (Cheb basin, Bohemian Massif): youngest proved surface faulting in central Europe?*
Štěpančíková P., Tábořík P., Fischer T., Hartvich F., Karousová M., Stemberk J., Nováková L.
- 9.50 - 10.05 *A fault slip-rate on the northern front of the High Tien Shan, Kazakhstan*
Mackenzie D., Walker R.T., Abdрахmatov K., Campbell G., Grütznér C., Moldobaev A., Mukambayev A.
- 10.05 - 10.20 *Paleoseismicity on the northern part of the Yangsan Fault, S-E Korea*
Rezaei S., Leej-H., Hong Y., Gwon S-H., Kim Y-S. Rockwell T.K.
• Coffee Break + Poster Session •
- 11.20 - 11.40 *Morphogenic paleoearthquakes in the Andean broken-foreland (Pampean Ranges, Argentina): How large? How often?*
Costa C. (Invited)
- 11.40 - 11.55 *Evidence of paleoseismicity within the West Quebec Seismic Zone, eastern Canada, from the age and morphology of sensitive clay landslides*
Brooks G., Gregory R.
- 11.55 - 12.10 *Estimating magnitudes of paleo-earthquakes from multiple observations*
Hintersberger E., Decker K.
- 12.10 - 12.25 *Paleoseismology of the North Panamá Deformed Belt from Uplifted Coral Platforms at Moín and Limón, Caribbean Coast of Costa Rica*
Gath E., Gonzalez T., Madugo C., Montero W.
- 12.25 - 12.40 *Recent advances in the comprehension of the central Apennine seismotectonics, by cross-checking Quaternary geology, paleoseismological and seismological data.*
Gori S., Falcucci E., Moro M., Saroli M., Fubelli G., Chiarabba C., Galadini F.
- 12.40 - 13.05 *Historic and Prehistoric earthquake ruptures of central Asia*
Walker R.T., Abdрахmatov K., Campbell G., Gruetznér C., Mackenzie D., Mukambayev A.
• Lunch •
- 15.00 - 15.20 *Paleoseismology of normal faults in the Mediterranean using in-situ Chlorine-36 cosmogenic nuclide*
Benedetti L., Tesson J. (Invited)

- 15.20 - 15.35 *Speleoseismology in Northern Calabria: a tool for unravelling the paleoseismic history*
Kagan E., Cinti F.R., Alfonsi L., Civico R., Bar-Matthews M.
- 15.35 - 15.50 *Evaluation of the seismogenic potential in key areas of the central and southern Apennines through analysis of speleothem vulnerability*
Ferranti L., Pace B., Vasta M., Colella A., Ramondini M., Calcaterra D., Di Bianco S., Valentini A., De Massis J., Teodoro P., Berardi D., La Rocca N.
- 15.50 - 16.05 *Paleoseismicity data on the San Demetrio ne' Vestini fault (L'Aquila Basin, Central Italy)*
Blumetti A.M., Di Manna P., Vittori E., Comerchi V. & Guerrieri L.
- 16.05 - 16.20 *Looking for seismites in the Fucino basin: preliminary results from an combined geological geophysical approach*
Smedile A., Civico R., Del Carlo P., Sapia V., De Martini P.M., Pantosti D., Brunori C., Orefice S., Pinzi S., Pucci S.
- 16.20 - 16.35 *Implications of slip rate variability along extensional faults in the central Apennines for geodynamic interpretations and earthquake hazard assessment*
Cowie P.A., Roberts G. P., Phillips R. J., McCaffrey K., Gregory L. C., Faure Walker J., Zijerveld L. J. J., Dunai T. J. Binnie S.A., Freeman S., Wilcken K., Wedmore L., Watson Z., Papanikolaou I.
• Coffee Break + Poster Session •
- 17.00 - 18.30 *Workshop EPOS - EuroGeoSurveys*

WORKSHOP EPOS - EUROGEOSURVEYS - TUESDAY 21 APRIL, 17.00 - 18.30

The European Plate Observing System (EPOS) is an integrated solid Earth Sciences research infrastructure aimed at promoting innovative approaches for a better understanding of the physical processes such as earthquakes, volcanic eruptions, tsunamis etc.

EuroGeoSurveys (EGS) is a not-for-profit organisation representing 33 National Geological Surveys and some regional Surveys in Europe. It provides the EU Institutions with expert, neutral, balanced and practical pan-European advice and information on several geological areas including the identification of geohazard, the use of georesources, the development of interoperable and harmonised geoscientific data at the European scale, etc. The workshop is aimed at showing to the Fucino 2015 participants the activities carried out in the frame of both these initiatives. In this context, EPOS and EuroGeoSurveys will sign a Memorandum of Understanding for future joint collaboration.

SEISMIC AND TSUNAMI HAZARD

- 9.00 - 9.20 *Active Tectonics and Seismic Hazard in Skyros Basin, North Aegean Sea, Greece*
Papanikolaou D., Nomikou P., Rousakis G., Livanos I., Papanikolaou I. (Invited)
- 9.20 - 9.40 *Challenges facing Fault-Based PSHA for $6 \leq M \leq 7$ earthquakes: An example from the west Corinth rift, Greece*
Scotti O., Ford M., Lambotte S., Boiselet A., Matrullo E., Lyon-Caen H., Albini P., Rovida A., Bernard P., Satriano C., Briole C., ANR-SISCOR Team (Invited)
- 9.40 - 10.00 *ESI-07 ShakeMaps for Instrumental and historical events in the Betic Cordillera (SE Spain): a preliminary approach applied to seismic hazard based on geological data*
Elez J., Silva P.G., Giner-Robles J.L., Rodríguez-Pascua M.A., Pérez-López R., Roquero E., Bardaji, Huerta P., Martínez-Graña A.
- 10.00 - 10.15 *Probabilistic Fault Displacement Hazard Analysis (PFDHA): database that needs to be considered*
Serva L., Livio F., Gurpinar A.
- 10.15 - 10.30 *Graviquakes*
Dogliani C., Carminati E., Petricca P., Riguzzi F.
• Coffee Break + Poster Session •
- 11.30 - 11.50 *Accommodation of Strike-Slip by Normal Faults and Block Rotations in the Transensional Walker Lane of North America*
Wesnousky S., Bormann J., Kreemer C., Hammond W., Brune J. (Invited)
- 11.50 - 12.05 *Long-term strain rates as a tool for understanding the mechanics of continental extension and the importance of local 3D fault geometry for local throw-rates across faults*
Faure Walker J.P., Roberts G. P., Cowie P.A., McCaffrey K., Wedmore L., Watson Z., Gregory L. C.
- 12.05 - 12.20 *Interseismic ground velocities of the Central Apennines from GPS and SAR measurements and their contribution to seismic hazard modelling: preliminary results of the ESA CHARMING project*
Pezzo G., Merryman Boncori J.P., Visini F., Carafa M., Devoti R., Atzori S., Kastelic V., Berardino P., Fornaro G., Riguzzi F., Pietrantonio G., D'Amico V., Meletti C., Salvi S.
- 12.20 - 12.35 *Earthquake geology of shallow crustal faults and Seismic Hazard Assessment: Challenges ahead*
Baize S., McCalpin J., Scotti O., Costa C., Cinti F.R., Michetti A. M., Okumura K., Dawson T.
- 12.35 - 12.50 *Fault Specific Seismic Hazard Maps for the Attica Region*
Deligiannakis G., Papanikolaou I.D., Roberts G.
- 12.50 - 13.05 *The May 24, 2014 North Aegean Trough earthquake: stress change and displacement patterns*
Sboras S., Chatzipetros A., Pavlides S., Fotiou A., Pikridas C., Bitharis S.
• Lunch •

- 15.00 - 15.15 *The Environmental Seismic Intensity Scale (ESI 2007) for the 1995 $M_s=6.6$ Kozani-Grevena Earthquake and the 1894 ($M=6.4, M=6.8$) Atalanti sequence in Greece; Preliminary relationships between Magnitude and the ESI 2007 for Greece and the Mediterranean area*
Papanikolaou I., Melaki M.
- 15.15 - 15.30 *Evaluation of the macroseismic intensities triggered by the February 3, 2014 Cephalonia, Greece earthquake based on ESI-07 scale*
Papathanassiou G., Valkaniotis S., Ganas A., Papanikolaou M.
- 15.30 - 15.45 *Assessing seismic efficiency from scalar Moment-rates: an application to Mt. Etna volcano (Italy)*
Azzaro R., Barberi G., Cannavò F., Cocina O., Palano M., Scarfi L.
- 15.45 - 16.00 *Earthquake-induced Geomorphology: A Neotectonic Study at the Front of the Alps (Lake Thun & Aare Valley, Switzerland)*
Fabbri S. C., Anselmetti F. S., Herwegh M., Schlunegger F., Volken S., Möri A.
- 16.00 - 16.20 *Tracing geological records of recent tsunamis from the tropics to the polar regions - insights into their regional variability and new research approaches*
Szczuciński W. (Invited)
- 16.20 - 16.40 *Reliability of first-hand accounts on the study of past tsunami events in northeastern Venezuela (southeastern Caribbean Sea), since 1530 AD*
Audemard F.A., Leal Guzmán A.F. (Invited)
• Coffee Break + Poster Session •
- 17.15 - 18.00 INQUA Business Meeting

BUSINESS MEETING OF INQUA TERPRO PALACTE FOCUS GROUP - WEDNESDAY 22 APRIL, 17.15 - 18.00

The Focus Area on Paleoseismology, Active Tectonics of INQUA TERPRO will invite all the Fucino 2015 participants to join the Business Meeting that will discuss potential future scientific activities and collaborations in the frame of the Focus Area.

POSTER SESSIONS

Scientific posters will be displayed in "Palazzo Palladini" in front of the Silone Theater. Posters must be in portrait format (width 85 cm; height 120 cm). Each poster has an assigned space and can be shown for the entire period of scientific sessions. Thus, participants are kindly recommended to attach their own poster in the morning of Monday 20th and to remove it in the afternoon of Wednesday 22nd.

Specific material for sticking the poster directly to the wall will be available on site. Please note that Authors of posters will be kindly requested to shortly present their work in front of their Poster during the dedicated Poster Session. Below are reported titles, authors and ID of all posters listed by each scientific session.

QUATERNARY GEOLOGY_Monday 20

Pisarska-Jamrozý M., Van Loon A.J., Nartišs M., Krievāns M. - Seismites recording glacio-isostatic rebound after melting of the Scandinavian Ice Sheet in Latvia. **QUA_01**

Alarcon E., Audemard F.A., Singer A. - Active tectonics in the Santa Ines basin (Venezuela): morphotectonic evidence related to blind thrusting with opposite vergences. **QUA_02**

Hoffmann A., Reicherter K. - Active tectonics and the link to evolutionary processes: The Lake Ohrid Basin **QUA_03**

Zaagane M., Refas S., Hamimed A. - Integration of geomorphologic, geotechnical, geophysical and seismic data for the construction of a morpho-structural 3D model: case of Bordj Bou Naama landslide (western Algeria) **QUA_05**

Villani F., Tulliani V., Sapia V., Fierro E., Cívico R., Baccheschi P., Di Giulio G., Vassallo M., Pantosti D. - Shallow subsurface imaging of the Piano di Pezza active normal fault (central Italy) using high-resolution refraction and electrical resistivity tomography coupled with time-domain electromagnetic data. **QUA_08**

Bouhadad A. - Paleoseismology of active blind faults (active folds): contribution of earthquake induced secondary geological and geomorphological effects. **QUA_09**

Lo Sardo L., Pezzo G., Moro M., Saroli M., Fubelli G., Lancia M., Galadini F. - Ancient settlements in central Italy and capable faults: consequences for urban planning in the L'Aquila region. **QUA_24**

Öğretmen N., Cosentino D., Gliozzi E., Cipollari P., Yıldırım C. - Holocene extensional faulting at the southeastern margin of the Central Anatolian Plateau: Implications for the kinematics of the Eceñiş Fault Zone (Mersin, southern Turkey). **QUA_10**

Cívico R., Sapia V., Di Giulio G., Villani F., Pucci S., Vassallo M., Baccheschi P., De Martini P.M., Amoroso S., Cantore L., Di Naccio D., Smedile A., Orefice S., Pinzi S., Pantosti D., Marchetti M. - Imaging the three-dimensional architecture of the Middle Aterno basin (2009 L'Aquila earthquake, Central Italy) using ground TDEM and seismic noise surveys: preliminary results. **QUA_11**

Tertulliani A., Cucci L. - Coseismic hydrological changes in response to the 1915 Fucino (Central Italy) earthquake. **QUA_12**

Pousse L., Vassallo R., Jouanne F., Audemard F., Pathier E., Carcaillet J., Garambois S., Oropeza J. Aray J. - Geomorphological slip rate and preliminary paleoseismological study along the Boconó Fault, Venezuela. **QUA_13**

Michail M., Chatzipetros A. - Use of quantitative geomorphological methods in the segmentation of Sperchios activefault zone, central Greece. **QUA_14**

Pallikarakis A., Grützner C., Mason J., Schneiderwind S., Papanikolaou I., Triantaphyllou M., Migiros G. - Correlating magnetic susceptibility with facies changes within borehole cores on either sides of an active fault in Corinth Canal. **QUA_17**

Pallikarakis A., Papanikolaou I., Triantaphyllou M., Reicherter K., Migiros G. - Study of an active fault at the eastern tip of the Corinth Canal, through surface and borehole data. **QUA_17**

Spadi M., Cosentino D., Nocentini M., Gliozzi E. - Sedimentary and tectonic evolution of the San Nicandro lacustrine depositional system (Pliocene-Pleistocene, southern L'Aquila Basin, central Italy). **QUA_20**

Meschis M.; Roberts G.P., Houghton S., Underwood C., Briant R.M. - Deriving uplift and crustal deformation rates in the upper plate of subduction zones from tectonically deformed sequences of marine palaeoshorelines; tectonic and seismic hazard implications in Calabria (Southern Italy). **QUA_22**

Frigerio C., Zerbini A., Livio F., Bonadeo L., Michetti A. M., Brunamonte F. Fioraso G., Amit R., Porat N. - Geochronology, pedostratigraphy, and late Quaternary landscape evolution in the western Po Plain (northern Italy). **QUA_23**

Miccadei E., Piacentini T., Berti C. - Neogene-Quaternary evolution of the Eastern Marsica region (Central Italy). **QUA_25**

Buscher J., Ascione A., Valente E., Mazzoli S. - Inferring surface uplift from longitudinal stream profiles in the Mt. Alpi area, southern Apennines, Italy. **QUA_29**

De Caterini G., Blumetti A.M., Coen G., Della Ventura G., Eulilli V., Ferri F., Guerrieri L., Leoni G., Lucci F., Mariani M., Puzilli L., Santoponte A., Vittori E., Zaffiro P. - New preliminary data on the Late Quaternary evolution of Magliano dei Marsi area (Abruzzo, Central Italy). **QUA_30**

Pierantoni P.P., Centamore E., Costa M. - Comparison among some seismotectonic characteristics of the main historical earthquakes in the Central Apennines (Italy). **QUA_31**

Comerci V., Bidditu I., Di Manna P., Germani M., Piccardi L., Ventura G., Vittori E. - Tectonic evidence in the Palaeolithic site of Lademagne (San Giovanni Incarico – FR, Southern Latium, Italy). **QUA_36**

ARCHAEOSEISMOLOGY_Monday 20

Kázmér M., Kolaiti E. - Earthquake-induced deformations at the Lion Gate, Mycenae, Greece. **ARC_02**

Kazmer M. - Off-fault damages to masonry buildings – a classification. **ARC_03**

SOCIAL EVENTS

6th INQUA
International Workshop
on Active Tectonics
Paleoseismology
and Archaeoseismology

Traditional Dinner - Hotel Filippone **Monday 20th April, 8 p.m.**

A traditional dinner is planned at Hotel Filippone (Gioia dei Marsi), with degustation of typical food and traditional music ("Zampognari") from Marsica region. Cost € 55,00.

Registrations and payments at the Fucino 2015 Information Desk will be possible up to Monday 20th not later than 2 p.m.

Social Dinner - Ristorante Mammarossa **Tuesday 21st April, 8 p.m.,**

Social dinner is planned at Ristorante Mammarossa (Avezzano). The menu will include seafood and good wines. Cost € 40,00.

It is possible to register on-site to this event, at the Fucino 2015 Information Desk, up to Monday 20th not later than 2 p.m.

Family Program – 20th, 21st and 22nd April

Daily tours will be proposed to familiars of Fucino 2015 participants in the period of the workshop, in the most famous destinations of the Marsica and L'Aquila areas (e.g. Alba Fucens and Celano Castle, Pescasseroli and Abruzzo National Park, Sulmona).

More information, registration and payments at the Fucino 2015 Information Desk. Please note also that a minimum number of participants is needed for some tours.

EXHIBITION|DISLOCATIONS

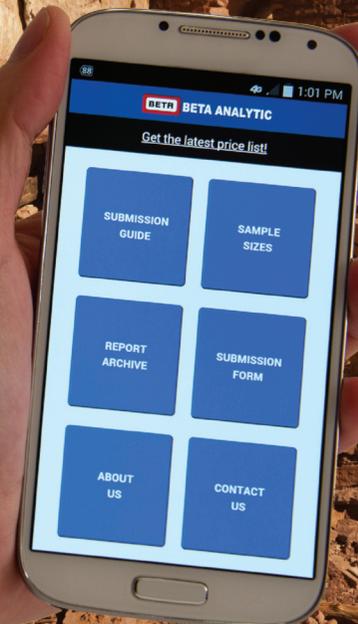

A group of artists in collaboration with Prof. Fabrizio dell'Arno of the Rome University of Fine Arts, present a catalogue of dislocations, as paths into the effects of earthquakes.

Some of the pictures have been inspired by historical photos of the destruction produced by the 1915 Avezzano earthquake.

Palazzo Palladini, Pescina (AQ), April 19-24, 2015.
