"Capacity Building and Strengthening Institutional Arrangement"

Interactive and multimedia tools to promote environmental awareness

Working group n°5 : "Design and development of environmental contents for educational tools (CD-ROMs, leaflets, booklets)" "

Mr. Gaetano Battistella, Mrs. Stefania Calicchia

APAT

Agency for Environmental Protection and Technical Services

Design and development of environmental contents for educational tools (CD-ROMs, leaflets, booklets)

<u>Objectives*:*</u>

The working group is finalised to outline the following learning approaches for environmental education, contained in the UNESCO programme "TLSF":

•Learning through Experience: students / citizens are encouraged in critical thinking, problem solution and make decision approach;

•Learning through Enquiry: students / citizens are made more active and responsible in their investigation and about their own knowledge;

•Learning for the Community: the aim of the education process is to help students / citizens to learn how to think and to solve the real issues of their local community

APAT

Design and development of environmental contents for educational tools (CD-ROMs, leaflets, booklets)

Activities:

Phase 1: choose one of the following environmental thematic areas to develop an environmental communication /education tool: Air ; Water; Soil; Nature and Biodiversity; Waste; Energy and Radiation; Demography and Economy; Environmental Culture and Sustainable Development

Phase 2: Define the target population to which address the tool

Phase 3: Develop some pages for an interactive tool of environmental education, containing the following aspects:

- Description of the issue

- Practical exercises (quiz, test, play) to assess one's own knowledge

- Key messages to change behaviours

Phase 4: Final presentation of the working group's activities
