**Interactive and multimedia tools to promote  
environmental awareness**

**Working group n°6**

**“How to design an environmental and  
educational e-learning system”**

**Mr. Gaetano Battistella, Mrs. Daniela Antonietti**

APAT

Agency for Environmental Protection and Technical Services

# How to design an environmental and educational e-learning system

## Objectives:

The working group is finalised to promote some considerations among participants about new technological tools such as environmental e-learning system or environmental Web Site and to illustrate the different steps to design and to develop environmental Web pages.

# How to design an environmental and educational e-learning system

## Activities:

**Pase 1:** Discussion and debate about previous experiences of EEAA on environmental e-learning and about possible applications at national level of environmental distance training and of dissemination of knowledge about environmental protection on large scale

**Pase 2:** Synthetic analysis about structural aspects, contents, images and other multimedia tools, of some Environmental Web Sites pages, in order to highlight the relevance of some communicative aspects of environmental Web Sites\_

**Pase 3:** Introduction to activities to design and to build up some web pages for environmental e-learning using texts and images dealing with different environmental issues, related to the following areas:

Air ; Water; Soil; Nature and Biodiversity; Waste; Energy and Radiation; Demography and Economy; Environmental Culture and Sustainable Development

**Pase 4:** Final presentation and discussion about working group's activities
