

“Capacity Building and Strengthening Institutional Arrangement”

Capacity Building for EEAA Training Departments

Working group n° 1
“Design Environmental Training
Programs”

Mr. Gaetano Battistella, Mr. Fabrizio Ciocca,
Mrs. Daniela Antonietti

APAT
Agency for Environmental Protection and Technical Services

Design Environmental Training Programs

Objectives:

The working group is finalised to share same preliminary considerations among participants to design a training course according to the main aspects of quality theories.

Design Environmental Training Programs

Activities:

Phase 1: Subdivision of the participants in working-groups

Phase 2: Discussion and debate about previous experiences about design on environmental training courses performed

Phase 3: Design of a general structure of an environmental course to be performed, taking into account the management of organizational aspects, the preparation and the organization of technical and scientific contents, also adopting new technologies and methodological approaches. In particular the working-groups should focus about the following aspects, such as :

- a) definition of the general objectives of the environmental training activities
- b) organizative aspects (human resources and audio-visual equipments needed to carry out the environmental training activities)

Design Environmental Training Programs

Activities:

- c) didactical aspects
- d) definition of methodological approaches (lessons, case-study, role-playing, working-group)
- e) definition of the main environmental issues to be trained
- definition of tools and kits to be adopted during the training activities

Phase 4: Following these considerations, the working-groups will develop a general scheme of the design of training activities in the environmental protection field, with the definition of a training program

Phase 5: Final presentation and discussion about working groups' activities
