

“Capacity Building and Strengthening Institutional Arrangement”

Capacity Building for EEAA Training Departments

Working group n° 4
**“Design a Training Kit as a Tool for
Environmental Protection Training”**

Mr. Gaetano Battistella, Mr. Fabrizio Ciocca

APAT

Agency for Environmental Protection and Technical Services

Design a Training Kit as a Tool for Environmental Protection Training

Objectives:

The working group is finalised to share some preliminary considerations among participants to design a training kit according to the main aspects of quality theories.

Design a Training Kit as a Tool for Environmental Protection Training

Activities:

Phase 1: Subdivision of the participants in working-groups

Phase 2: Discussion and debate about previous experiences about design training kits for environmental protection training

Phase 3: Design of a general structure of an environmental training kit to be developed, taking into account the development and organization of technical and scientific contents, also adopting multimedia technologies and approaches. In particular the working-groups should focus about the following aspects, such as:

a) Definition of the general objectives of the environmental training kit

Design a Training Kit as a Tool for Environmental Protection Training

Activities:

b) Organizational aspects

- human resources and audio-visual equipments needed to carry out environmental training kit
- definition of the main phases to prepare an environmental training kit

c) Didactical aspects

- definition of public target
- definition of different tools available (leaflets, booklets, Cd-Rom, Video, e-learning, etc.) to develop environmental training kits
- definition and development of scientific and technical contents

Phase 4: Following these considerations, the working-groups will develop a general scheme of the design of training kit in the environmental protection field

Phase 5: Final presentation and discussion about working groups' activities.
