

“Capacity Building and Strengthening Institutional Arrangement”

Workshop: Sustainable Development

Working group n°3

“Perform an environmental sensitive analysis for a defined project using EIA environmental indicators for sustainable development”

Mr. Gaetano Battistella, Ms. Marilena Flori

APAT
Agency for Environmental Protection and Technical Services

Perform an environmental sensitive analysis for a defined project using EIA environmental indicators for sustainable development

Objective:

The working group is finalised to the verification of use of the type-schemes for the characterization of EIA indicators.

Perform an environmental sensitive analysis for a defined project using EIA environmental indicators for sustainable development

Activities:

- a) Discussion and debate about the experiences that the participants have accrued to regard the use of indicators in environmental impact studies; with examples of possible recording of the characterization of selected indicators
- b) Illustration to the participants of the indicators check-list, divided into the environmental elements
- c) Completion of this check-list by participants with other indicators more suitable to the environmental and territorial context of reference

Perform an environmental sensitive analysis for a defined project using EIA environmental indicators for sustainable development

Activities:

- d) Subdivision of the indicators of the complete check-list according to the categories of DPSIR
- e) Distribution to the participants of the characterization schemes
- f) Filling out of the assigned schemes for one or two indicators, according to participant choice
- g) Discussion and debate about the characterizations performed
- h) Possible agreement on adaptation of the words of the scheme to the environmental and territorial reality of the reference context
- i) Conclusions about the activities of the working group.
