

Workshop

“ACOUSTIC POLLUTION AND MEASUREMENTS”

Working Group N. 1

“A tentative draft of an Egyptian legislation on environmental noise”

Objective

The activities of the working group are addressed to draw up a proposal of legislation on environmental noise with reference to Egyptian needs and on the basis of the Italian experiences. Analysing the technical presentations, the aim is to individuate particular elements of interest in the preparation of a law knowing the uses of the citizens, the characteristics of transport infrastructures, the distribution of the activity in the municipality’s territory.

Activities

- a) Analysis of the elements of interest for rules on environmental noise: social and sanitary aspects, technical criticality and economic needs; individualization of the involved authority in the legislative process and of process of authorization for new activities;
- b) Division of the participants into groups for the analysis of the above aspects;
- c) Elaboration by each group of a technical report on the specific subject;
- d) Analysis of the documents and discussion of the critical aspects;
- e) Elaboration of a hypothesis of structure of the rules;
- f) Discussion about the proposal and debate regarding the adopted choices, assessment of the feasibility also in terms of timing;
- g) Conclusions about the activities of the working group.
