

## Remove an appointed Verifier (new user interface)

Version 2: 23.06.2025

This type of operation is available exclusively for operator, aircraft and maritime operator **holding accounts** in the Union Registry. In fact, every year, installations, aircraft and maritime operators must have their emissions (tons of CO<sub>2</sub>eq, and possibly PFCs and N<sub>2</sub>O) from the previous year validated by the accredited body they chose for verification ("Verifier" in the Registry).

The account Holder who has appointed a Verifier to his/her account can decide to **remove it and/or replace** it with another Verifier among those available in the Registry.

**Warning:** if you intend to replace the Verifier for the next compliance cycle, do not enter the emission figures before completing the replacement. For instructions, you can view the tutorials [Replace an appointed Verifier](#) on the [Tutorial and guides](#) page of the ARIET website).

**Follow the instructions in the table to remove the appointed Verifier**

Interface element	Action
<p>1</p> 	<p>Log into the italian section of the Union Registry at <a href="https://union-registry.ec.europa.eu/ar/">https://union-registry.ec.europa.eu/ar/</a></p> <p>Select “<b>Italy</b>” from the drop-down menu Find Registry and click <b>Login</b>.</p> <p>Login issue?
