INDOOR AIR QUALITY AT SCHOOL: THE *SEARCH* INITIATIVE

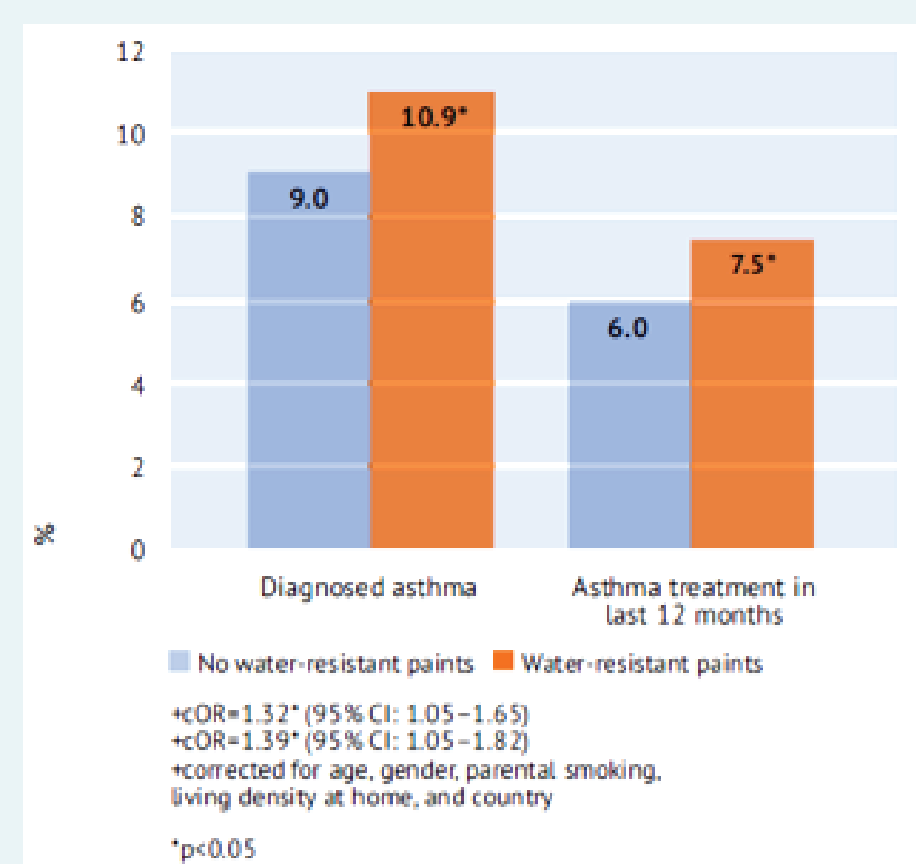

F. De Maio, L. Sinisi, J. Tuscano - ISPRA E&H Unit

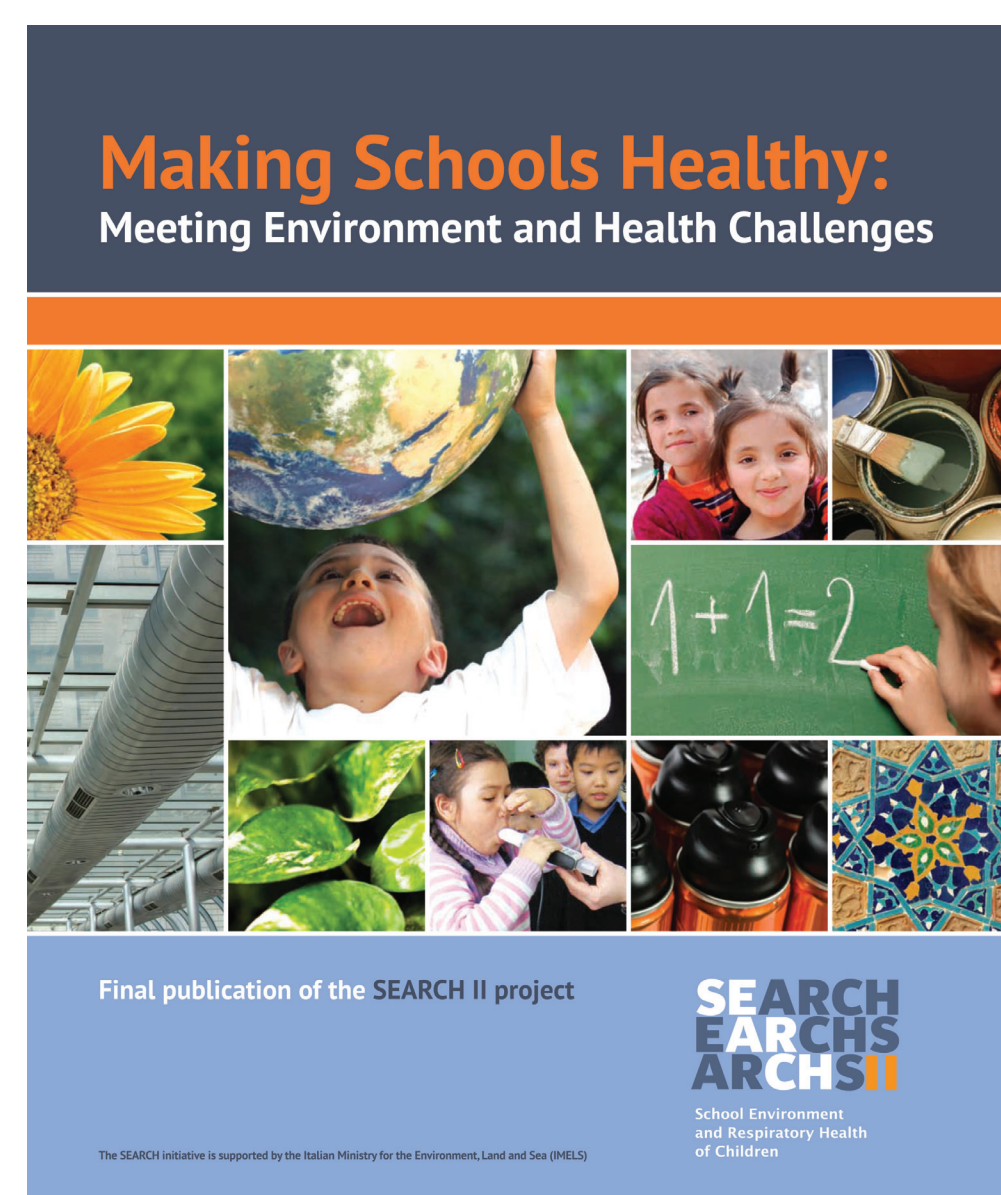

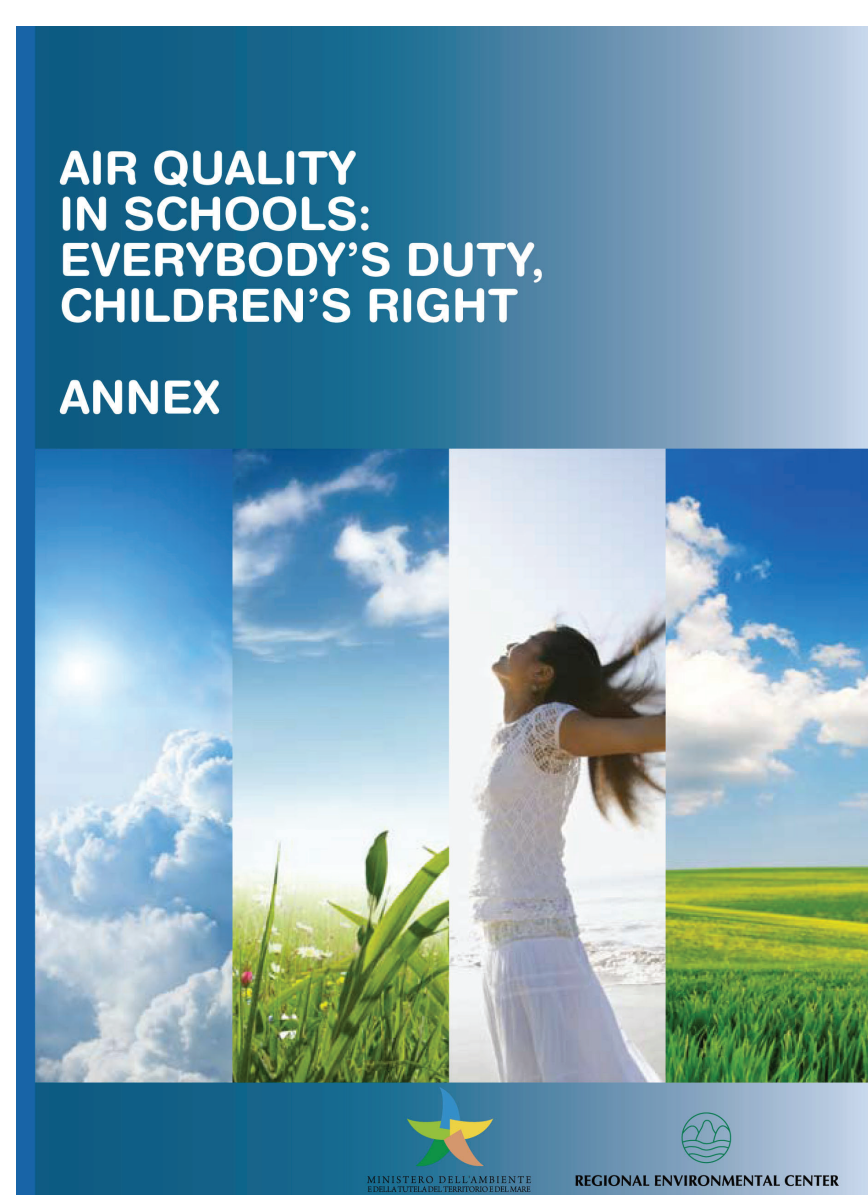

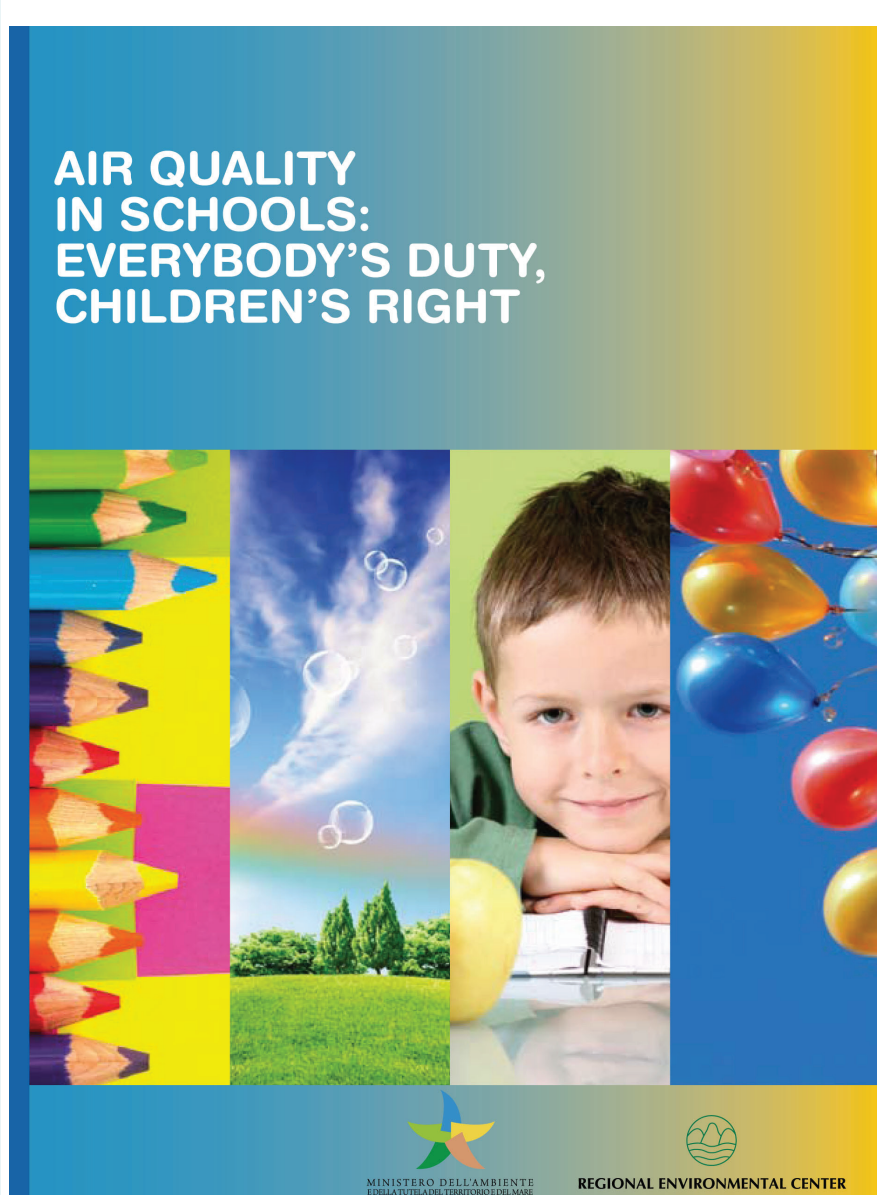

Relationship between concentrations measured inside the classrooms and outside the schools in the 10 SEARCH countries

Prevalence (%) of children with various types of diagnosed allergy in classrooms with and without plastic flooring

Prevalence (%) of children with asthma or asthmatic symptoms in classrooms with walls painted with water-resistant paint.

Kids' Corner:

Memory Game The game is designed for use by children, providing them with a fun way to access important facts about indoor air quality by finding matching pairs of pictures.

Quiz Designed for use by children, the quiz tests how much they have learned in the course of the lessons delivered by their teachers using the Air Pack material.

The main goal of the SEARCH 3 project (2014–2015)

Was to implement in practice all the results achieved in the context of the SEARCH initiative into a user-friendly educational toolkit "AirPack" for teachers and children aged between 8 and 11. (www.airpack.rec.org)
